Enhance your quality of life with **Beltone Boost Ultra**

Our newest hearing aid for people with severe-to-profound hearing loss is the industry's most comprehensive hearing solution – with even clearer sound quality, unrivalled connectivity features, and state-of-the-art personalisation all in one single hearing solution.

After years of innovating and breaking new ground, we are now introducing a solution with new and improved sound-processing technology. Our new chip is significantly faster and the foundation for an industry-leading sound quality – not to mention the best clarity and speech understanding yet.

It's also equipped with technology that enables us to customise each hearing aid to uniquely suit your needs. Regardless of the severity of your hearing loss, Beltone Boost Ultra is designed to upgrade your life from good to ultra good.

A photograph of a man and a woman laughing together outdoors. The woman is on the left, wearing a blue and white striped shirt, and the man is on the right, wearing a dark shirt. They are both smiling broadly, showing their teeth. The background is a blurred garden with green foliage and a wooden fence. The text 'ULTRA GOOD sound quality' is overlaid on the right side of the image.

ULTRA GOOD

sound quality

Experience a clearer sound quality with Beltone Boost Ultra. The new sound-processing chip offers you Beltone's latest and fastest micro-processing, which means you can enjoy more clarity and better speech understanding than ever before. Your listening experience will be enhanced when you can pick up on delicate sounds, enjoy music with even more detail, and feel more comfortable when loud sounds arise.

Greater situational awareness

Our industry-leading CrossLink Directionality 2 with Personal Sound ID makes it easier for you to focus on what you want to hear without losing touch of the other sounds around you, so you always feel involved and more at ease wherever you are. Conversations and ambient noise now sound natural and clear.

Designed to handle any moment

Impulse Noise Reduction

People who wear hearing aids know that brief, loud noises – like keys dropping on a table or plates being stacked – can sound jarring. Beltone Boost Ultra can detect these sounds and act quickly to ensure they don't become annoying. Our latest technology now catches these very quick, loud sounds and keeps them at a comfortable level.

Longer Battery Life

With Beltone Boost Ultra, you'll feel all the benefits of an improved battery life that lasts up to 20% longer.* Our new chip was designed with technology that enables the hearing solution to run quickly and efficiently for your everyday life, especially when it comes to connecting to your favourite activities.

*Only applies to devices with battery size 13

A man with a beard and a blue sweater is shown from the side, looking down at a smartphone he is holding. He has a small, grey hearing aid device in his left ear. He is sitting at a wooden table in an outdoor restaurant setting. In the background, other people are seated at tables, and there are green plants and warm, glowing lights, suggesting a pleasant evening atmosphere.

ULTRA GOOD

connectivity

When you upgrade to Beltone Boost Ultra, you'll feel the freedom of best-in-class connectivity with direct access to all your important devices. This means longer and easier direct streaming of your favourite songs, audiobooks, TV shows, and more. No matter where you are you'll always be connected.

Direct streaming from iOS and Android devices

Beltone Boost Ultra iOS and Android compatibility lets you feel empowered and free with direct streaming services for all phone calls, GPS, internet radio, music, podcasts, and audiobooks. And you can stream all of this directly to your Beltone Boost Ultra hearing aids, without missing a single sound.

In addition, the Beltone HearMax™ app is compatible with any iOS or Android device. This gives you the ability to easily and discreetly control their sound.

You won't miss a beat

Beltone Boost Ultra features **Mix-in Audio Streaming**, which has significantly reduced noise delay. Now you'll have crystal clear audio from the second you begin streaming.

More ways to connect to life

Extend Your Hearing

Beltone Direct Line wireless accessories stream sound directly to your Beltone Boost Ultra hearing aids, keeping you easily connected to all of your favourite communication and entertainment devices. Whether you're watching television with the Beltone TV Link 2, adjusting the volume of your hearing aids with the Beltone Direct Remote Control, engaging in a conversation from a distance with a Beltone myPAL device, we have every wireless accessory to improve your hearing experience. Simply connect them to your Beltone Boost Ultra hearing aids and enjoy the freedom of high-quality sounds anytime, anywhere.

Telecoil

Beltone Boost Ultra also has telecoil built in to provide you with even more ways to stay connected. Telecoil technology enables you to link up with sound systems in multiple settings, such as museums, theatres, cinemas, care centres, auditoriums and much more.

Beltone myPAL Pro and myPAL Micro:

Attach these microphones to friends, colleagues, professors or whoever you wish to hear. The microphones send sound directly to your Beltone Boost Ultra hearing aids for the clearest sound and speech understanding.

ULTRA GOOD personalisation

Enjoy the best hearing wherever and whenever and feel confident knowing that your hearing care professional will always be there to help. Conveniently adjust and improve your hearing your way – in the clinic, through your app or direct live streaming with your hearing care professional. With Beltone Remote Care, you can even get your hearing aids fine-tuned from the comfort of your own home.

Personalised care and support from anywhere

Beltone Remote Care

Our technology has made getting support even more convenient. Request and receive fine-tunings without having to

make extra trips to the clinic. You can send your requests, through the Beltone HearMax app, to your hearing care professional. When your adjustments are completed, you'll receive a notification in your app notifying you to download and start using your new settings.

All-new Beltone Remote Care Live

It's all about easy, real-time hearing care with Beltone Remote Care Live. You and your hearing care professional can easily communicate via video and quickly resolve any issues there may be and remotely optimise the fine-tuning of your hearing aids. Connecting face-to-face is easily accomplished through the Beltone HearMax app from the comfort of your home.

The Beltone HearMax app

Meet the most advanced app for hearing aid users. You can easily control volume, adjust programs, noise reduction, speech focus and more – directly from your iPhone, iPad, iPod touch, Apple Watch or most Android devices. Simply download the app for free from the App Store or Google Play.

Choose Your Colour

Beltone Boost Ultra comes in five colours to match any skin tone, hair shade or style. Colours include charcoal, brown, grey, light grey and beige.
