

Beltone **Imagine**™

# Imagine using your hearing aids as a wireless headset

Phone calls keep us connected to the world. And more importantly, to our loved ones. That's why we've just made calls easier than ever. Introducing hands-free phone and FaceTime calls for iPhone and iPad\*. Made possible by premium streaming technology that allows you to treat your hearing aids as a wireless headset, tailoring every phone call experience to fit you and your needs. Simply tap the button on your hearing aids to answer a call.

Now you can effortlessly call your kids on iPhone and iPad while cooking dinner or checking in on friends while taking a stroll through a park. With Beltone Imagine, you'll keep conversations going with confidence knowing that your phone calls are easier than ever.

Made for

iPhone | iPad | iPod

## How to get hands-free calls

If you already use Beltone Imagine, your hearing care professional can upgrade you to this feature with a quick fitting software update. They are ready to hear from you.

If you haven't got Beltone Imagine yet, contact your hearing care professional to find out more about our tailored hearing solution and hands-free calls.

\* Beltone Imagine hands-free calls are compatible with iPhone 11 or later, iPad Pro 12.9-inch (5th generation), iPad Pro 11-inch (3rd generation), iPad Air (4th generation), and iPad mini (6th generation), with software updates iOS 15.3 and iPadOS 15.3 or later.

# Enjoy every call

With Beltone Imagine, talking on the phone is easier and more convenient than ever. Why? Because you choose the way you like to call!

## Easy video calls

Catching up with family and friends via FaceTime is another great, convenient way to stay connected with the ones you love, even from afar – with the natural sound of their voices streamed directly to your ears.

You can even use this streaming technology to have a video consultation with your hearing care professional for quick, easy, and seamless care. We call it Beltone Remote Care Live – simply schedule a meeting on the Beltone HearMax™ app and enjoy one-on-one care right from your couch.

## Effortless non-streamed phone calls

You can also enjoy the ease and normalcy of non-streamed phone calls from fixed, cordless or mobile phones, made possible with M&RIE (Microphone & Receiver-In-Ear). Previously, holding up a phone to your ear while wearing a hearing aid created some feedback until you found the 'sweet spot'. With M&RIE and the extra microphone in the ear, you can hold the phone normally close to your ear and Beltone Imagine will pick up conversations clearly and naturally without any whistling sounds – locating the 'sweet spot'.

Users who have tried Beltone Imagine with M&RIE found it easy to position their phone by their ear to benefit from our most natural sound yet – and would recommend this feature to others.
